

SUJAL MAGARDE

B.Tech Computer Science Engineering | Batch 2027
+91-76498-60393 | magardesujal00@gmail.com | Bhopal Madhya Pradesh

CAREER OBJECTIVE

Computer Science student with good knowledge of programming and full-stack development. Looking for an entry-level Software Engineer role where I can use my problem-solving skills, work on real projects, and learn new technologies while building useful and efficient applications.

EDUCATION

Bachelor of Technology – Computer Science and Engineering June 2027
Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Bhopal, Madhya Pradesh CGPA: 6.95 / 10.0

Class XII (MP Board) Passed: 2023
Govt. Excellence Boys Higher secondary School, Bhainsdehi Score: 68.8%

Class X (MP Board) Passed: 2021
Govt. High School, Pohar Score: 78.0%

EXPERIENCE

• JPMorganChase Software Engineering Job Simulation on Forage

May 2025 - November 2025

- Integrated Kafka into a Spring Boot microservice to consume and deserialize high-volume transaction messages using a configurable topic and embedded Kafka test framework.
- Implemented transaction validation and persistence logic with Spring Data JPA and an H2 SQL database, including entity modeling and balance updates across relational User records.
- Connected the service to an external REST Incentive API using Rest Template, processing incentive responses and incorporating them into transactional workflows.
- Developed a REST endpoint for querying user balances, returning JSON responses through a Spring controller while maintaining clean architectural boundaries.
- Verified system behavior using Maven test suites and debugger-driven inspection, ensuring reliability across message ingestion, database operations, and external API interactions.

SKILLS

- Language:** C, C++, Java, Spring Boot, HTML, CSS, JavaScript, React.JS, Node.js, MySQL
- Tools & Platform:** Git, GitHub, VS Code, Docker (Basic)
- CS Fundamental:** Data Structure & Algorithms, DBMS, OS, Computer Networks, OOP

PROJECTS

Student Management System

Tools: ReactJS, Node.js, MySQL, Express

- Designed and developed a full-stack web-based system to manage student records.
- Implemented modules for attendance tracking, fee management, and receipt generation.
- Used MySQL for database design and efficient data retrieval.
- Applied object-oriented programming principles in backend development.
- Improved administrative efficiency by organizing data digitally.

Role:

- Developed backend for Student Management System using Node.js and Express.JS, implementing REST APIs and database integration.
- Built secure and efficient server-side logic for managing student data.

Alumni Connect System

Tools: ReactJS, Node.js, MySQL

- Developed a web-based platform to connect students with alumni for career guidance and networking.
- Implemented user registration, login authentication, and profile management features.
- Designed database schema using MySQL for secure data storage.
- Enabled messaging and interaction between students and alumni.

Role:

- Developed backend for Alumni Connect platform using Node.js, implementing REST APIs, authentication, and database integration.

ACHIVEMENTS

- Completed JPMorgan Chase Software Engineering Simulation.
- Participated in a hackathon, collaborated in a team to design and develop a solution under time constraints.
- Complete Core Java programming-Infosys.
- Complete introduction to computer network-CISCO.
- Placement Readiness Workshop-SISTec.
